# Cure Végétale (Botanical Cure) Soothing Care for Fragile Capillaries Skin (Rosacea Treatment)

## ROSACEA CARE

A line of professional skin care products dedicated to those people who have the condition known as rosacea and to anyone who has sensitive skin and the need for mild and soothing skin care.

bleu & marine Cure Végétale contains seaweeds, healing botanical extracts, pure essential oils and therapeutic ingredients which are synergistically combined to reduce the facial redness caused by Rosacea.

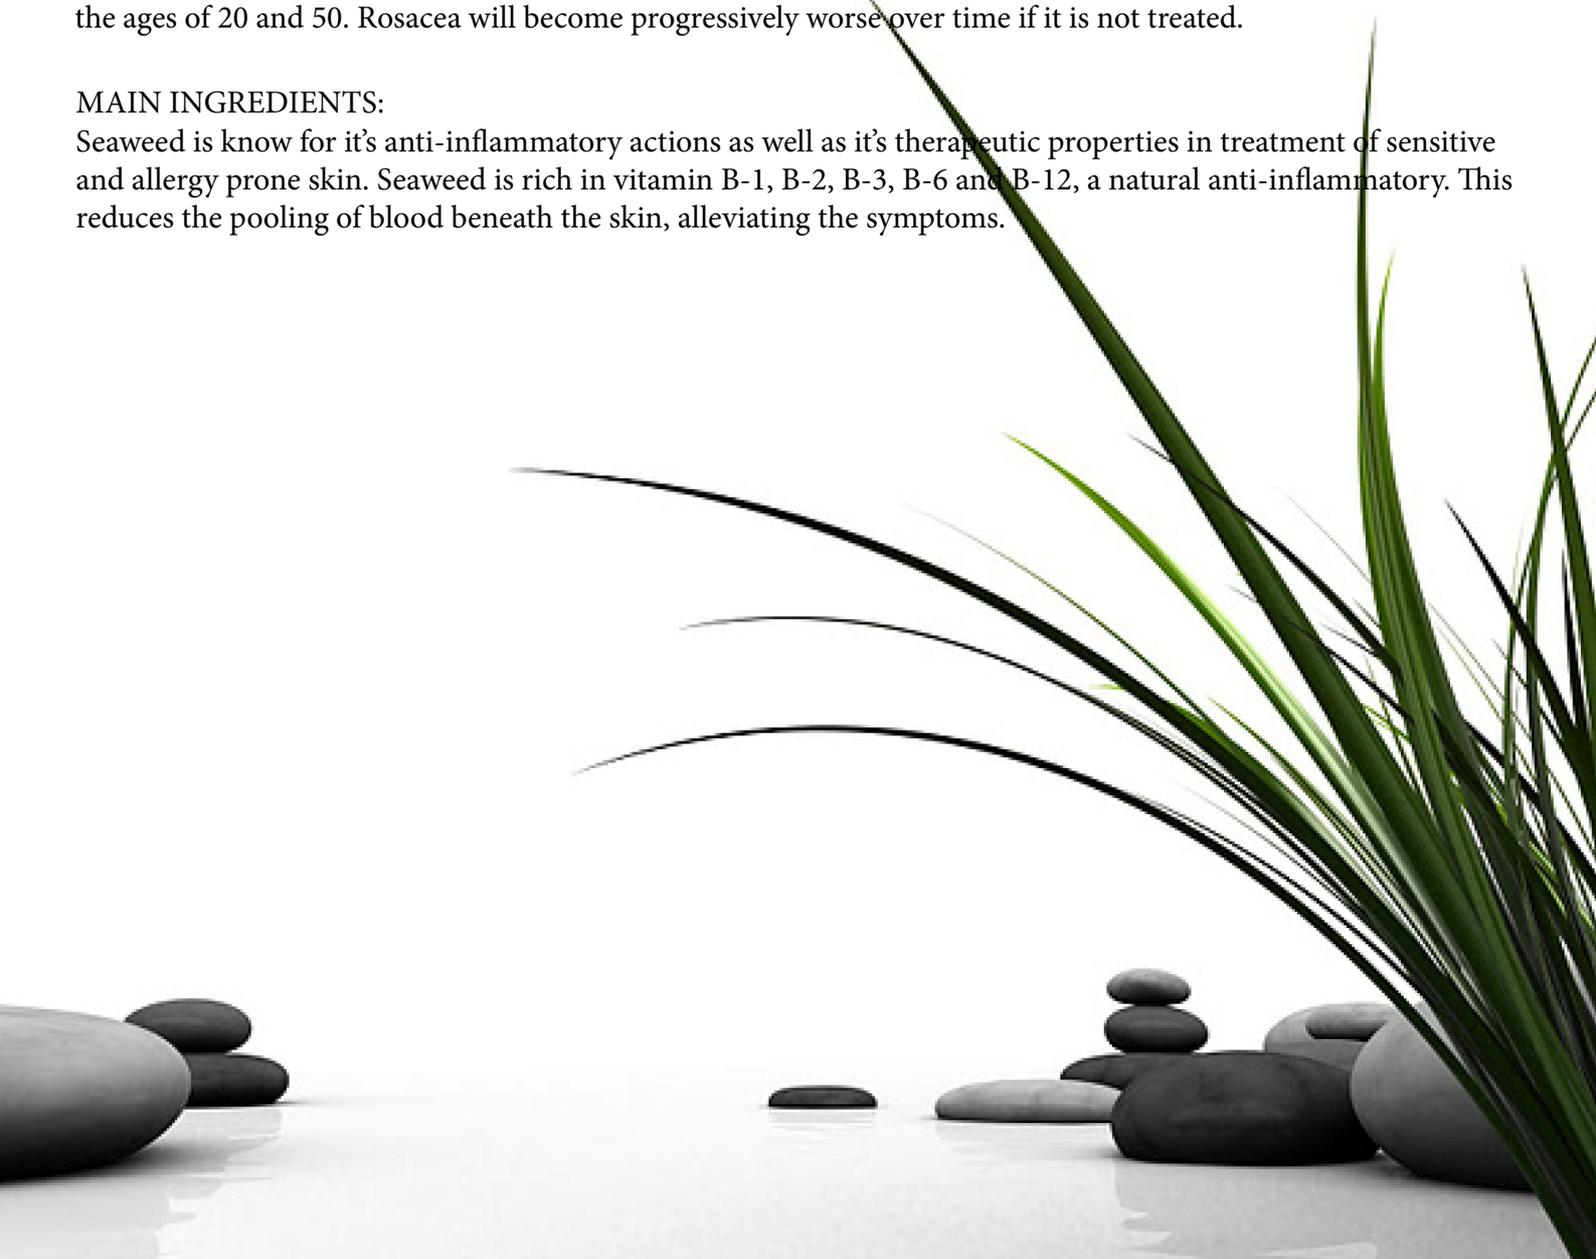

Reduces the visibility of dilated blood vessels and further susceptibility by normalising and strengthening the skin. It also re-hydrates the skin.

Rosacea is a skin condition that causes a persistent redness on the face, in particular on the cheeks, nose and forehead. Rosacea manifests itself initially as a facial blushing that does not seem to disappear completely. The initial redness may come and go, but over time develops into a more persistent redness that resembles inflammation (like a sun burn). In addition, the face often will feel itchy and painful.

The condition is estimated to affect 45 million people worldwide and affects mostly fair-skinned people between the ages of 20 and 50. Rosacea will become progressively worse over time if it is not treated.

### MAIN INGREDIENTS:

Seaweed is known for its anti-inflammatory actions as well as its therapeutic properties in treatment of sensitive and allergy prone skin. Seaweed is rich in vitamin B-1, B-2, B-3, B-6 and B-12, a natural anti-inflammatory. This reduces the pooling of blood beneath the skin, alleviating the symptoms.

# Product-by-product Range Overview

## Hydra Continu 24 – massage oils cocktail

*Improves rosacea skin condition. Stand-alone repairing soft moisturiser.*

## Cure Végétale Anti-Rosacea Cream

*Plant extracts with anti-inflammatory, anti-bacterial and anti-redness properties are carefully selected, together with other organic, renewable and biodegradable ingredients. The intended purpose is to calm & soothe the irritated skin, at the same time, alleviates visible symptoms & assists self-healing to lessen the chance of re-occurrence.*

## Cure Végétale Anti-Rosacea Mask

*Cure Végétale Mask was specifically created for the care of fragilized skin.*

*The essential nutritive and hydrating elements included in the Cure Végétale Mask constitute the natural protection shield of the skin.*

*An "anti-stress" complex of 8 marine & botanic elements instantly soothes the epidermis for a long time. The skin recovers an amazing sensation of well-being and extreme comfort. It is visibly stronger and more resistant.*

## Cure Végétale Anti-Rosacea Complex

*Produces instant relief by improving local circulation.*

- dispels redness
- hydrates skin and softens
- calms skin

## Sensitive Skin & Rosacea peel-off\* Mask

*Bilberry extract is combined with azulen for calming effects in case of irritation. Anthocyanocides contained in the Bilberry extract are known to their anti-couperose activity, their stimulating peripheral blood circulation and to strengthen the capillary blood vessel structure. Azulen is an anti-inflammatory and calming ingredient extracted from the Camomile essential oil.*

Risk Factors in Aquiring Rosacea

What Causes Rosacea?

Rosacea Symptoms

Rosacea is a common skin disease that causes redness and swelling on the face.

Often rosacea may begin as a tendency to flush or blush easily, and progress to persistent redness in the centre of the face that may gradually involve the cheeks, forehead, chin, and nose.

It also may involve the ears, chest and back.

As the disease progresses, small blood vessels and tiny pimples begin to appear on and around the reddened area. However, unlike acne, there are no blackheads.

When it first develops, rosacea may come and go on its own.

When the skin doesn't return to its normal colour and when other symptoms, such as pimples and enlarged or broken capillaries become visible, it is best to seek advice from a dermatologist.

Rosacea is a potentially devastating disease that rarely reverses itself and may last forever. It typically becomes worse without treatment.

#### Risk Factors in Acquiring Rosacea

The prime risk factors in acquiring rosacea are sun damage, a propensity to flush and a genetic predisposition,

#### What Causes Rosacea?

Although the precise causal mechanisms which produce rosacea remain to be elucidated, in addition to hereditary factors, a great many other factors have been implicated in the development and worsening of the disease.

These factors include :

- systemic heliobacter pylori infection;
- invisible infestation of skin by demodex mites;
- sun damage / photoaging;
- free radicals;
- fragile or dysfunctional capillaries;
- allergies (to topical and ingested substances);
- psychosomatic factors.

#### Early Rosacea Symptoms

Redness becomes persistent, and:

Pimples, papules and pustules of rosacea appear on the face as red bumps, some of which may contain pus.

These may be accompanied by the development of many tiny broken capillaries on the surface of the skin.

#### Advanced Rosacea Symptoms

In about 50% of people, rosacea can spread to the eyes to cause a condition known as ocular rosacea.

Rhinophyma is also an advanced rosacea symptom, generally only seen in men.
